CRAC Korea (2024).

Navigating Regulatory Compliance Strategy in Global Cosmetics Industry

16th Chemical Regulatory Annual Conference

September 10, 2024

Seoul, South Korea

ORGANIZERS: REACH24H CONSULTING GROUP – REACH24H KOREA CO.,LTD

SPONSOR: KOREA COSMETIC INDUSTRY INSTITUTE (KCII)

MEDIA PARTNER: CHEMLINKED

In today's rapidly changing global landscape, the pace of economic growth has slowed, creating fresh uncertainties and challenges for businesses worldwide. As industries grapple with this new reality, the Chemical Regulatory Annual Conference (CRAC) emerges as a beacon of knowledge, offering a platform for industry leaders to navigate evolving regulatory landscapes and seize untapped growth opportunities.

Since its inception in 2009, CRAC has become a key platform for promoting international regulatory communication and cooperation. The conference brings together industry experts, government authorities, and enterprise representatives from around the world, to share insights, explore innovative compliance solutions, and analyze market trends.

Now, in 2024, CRAC Global enters its 16th edition with an innovative approach, embarking on a global tour spanning China, South Korea, Japan, and Europe. With a laser focus on critical topics such as chemicals, pesticides, cosmetics, and sustainable development, the conference promises thought-provoking discussions, invaluable insights from industry experts, and a multitude of growth opportunities.

Korea's K-Beauty is already evaluated as the mainstream in the global cosmetics market, and according to a number of statistics, it is one of the world's top three cosmetics export powerhouses. The growth of the Korean cosmetics industry results in targeting the global market based on a strong and unique K-culture, world-leading idea products, and high technology with high-level quality product. Despite the environment in which exports of Korean cosmetics to China have been on the decline since COVID-19, the Korean cosmetics industry is constantly showing growth as it pioneered the US, European, and Japanese markets as alternative target. The first step in conquering the major cosmetics markets can be said to be regulatory compliance, and changes in regulations are one of the core values of the exporters. Responding quickly to these changes in global regulations is inevitably important to the Korean cosmetics industry.

Chemical Regulatory Annual Conference

Since 2009, the Chemical Regulatory Annual Conference (CRAC) has brought together global forces for 16 consecutive years to build industry dialogue, invite global government agencies, industry experts, and business representatives to discuss global chemical management trends, exchange international advanced management experience, and extend to sub-sectors such as pesticides, disinfectants, cosmetics, food contact materials, pharmaceuticals, green and low-carbon sectors, and promote green, safe, and sustainable development of the industry, injecting new vitality into the benign development of the industry.

Over the years, CRAC has established partnerships with renowned institutions such as the Helsinki Chemicals Forum (HCF), the United Nations Environment Programme (UNEP), the European Commission (EC), and the Organisation for Economic Co-operation and Development (OECD), etc. Notably, CRAC has attracted distinguished global government agencies and associations to its events, including the Ministry of Ecology and Environment of China, the Ministry of Emergency Management of China, the Ministry of Transport of China, the Ministry of Agriculture and Rural Affairs of China, the European Chemicals Agency, the United States Environmental Protection Agency, the National Institute of Environmental Research of South Korea, and many other government agencies and organizations.
